Part II - Quality

Application section and document:

Module 3.2.S.2.3 - Commitment to Quality

CTD Section 3.2.S - Body of Data

Consideration:

Quality - Please provide a detailed description and justification of the changes made to the manufacturing process for the drug substance, including the updated process flow diagram, step descriptions, in-process controls, and acceptance criteria. Additionally, submit updated process validation data demonstrating that the modified process is capable of consistently meeting the established specifications.

Sponsor response:

Updated information on the manufacturing process and process validation data are provided.
