

Report for the RFI Application

Efficacy and safety of NN-1234 in type 2 diabetes

Cover Letter

This substantial modification for trial 2024-519530-24-00 concerns Protocol version 4.0 dated 2026-01-15 for NN-1234. Approximately 320 subjects will be enrolled across 40 sites.

The signed cover letter has not yet been returned and is not attached. It will be provided once the sponsor legal representative completes the signature.

Regulatory

The application is submitted under Regulation (EU) No 536/2014. The sponsor confirms that the dossier is complete and that contact details are given in the application form.

Payment was arranged by the local affiliate. POL reference: POLXXXXX.

Protocol

Protocol v3.0, dated 2025-11-02. A total of 280 patients will be randomised in a 1:1 ratio. NN-1234 5 mg is administered once weekly for 52 weeks.

The schedule of assessments describes visits at screening, baseline, and every 12 weeks.

Informed Consent

The informed consent form has been updated to reflect the revised schedule of assessments. It describes the purpose of the trial, the foreseeable risks, and the right to withdraw.
